## ANNOUNCEMENT

---

We call attention to the manner in which orders have been filled the past year. Notwithstanding a short crop and increased values our contract orders have been filled, nearly complete. We feel your **Margin of Safety** with us, is such as should merit your business.

\* \* \* \* \*

An acreage will be planted of each variety to produce under ordinary conditions the various amounts required to fill all contract orders, and in no instance will any carry-over stock be used on contract orders, unless it may be mutually agreeable to our customers and ourselves. In case of shortages a sufficient reservation will be made for planting stock, after which all orders will be filled by an equal pro rata division of the entire remaining crop delivered to us by our various growers, all orders being treated alike.

Orders will be accepted for the growing of special stocks or new varieties at reasonable prices if planting stocks are furnished, and entire product to be taken by customers.

Orders for 25 pounds of a single variety of vine seeds will be filled at regular quotations; for orders of less than 25 pounds of a single kind, add five cents per pound. Bags extra at Waterloo, Nebr., values.

All contract prices are for prompt acceptance, and are subject to stenographic errors and omissions, fire and all other contingencies beyond our control.

Any claim as to shortweight, packing or condition of the seed is to be made within two weeks after arrival of the goods. We are not bound to either replace or make other amends should the seeds not meet requirements. We are never liable in any case to more than invoice price of goods. Should the final yield of seed be under our estimate we are under no obligation to fill as estimated. Crop failures release us entirely from obligation of delivery.

**TERMS.**—Field corn, cash on receipt and examination; sweet corn and vine seed, sixty days' acceptance, or if discounted, 1 per cent in thirty days from date of shipment. All prices are based on delivery f. o. b., Waterloo, Neb., or Rocky Ford, Colo., our option.

## Early Russian Cucumber

This variety is the earliest we produce and it is one of the most prolific of any. From  $3\frac{1}{2}$  to 4 inches long.

## Pearl Pink Meat

Not used extensively as yet but on every market it has commanded the highest prices. Salmon flesh and very attractive in appearance.

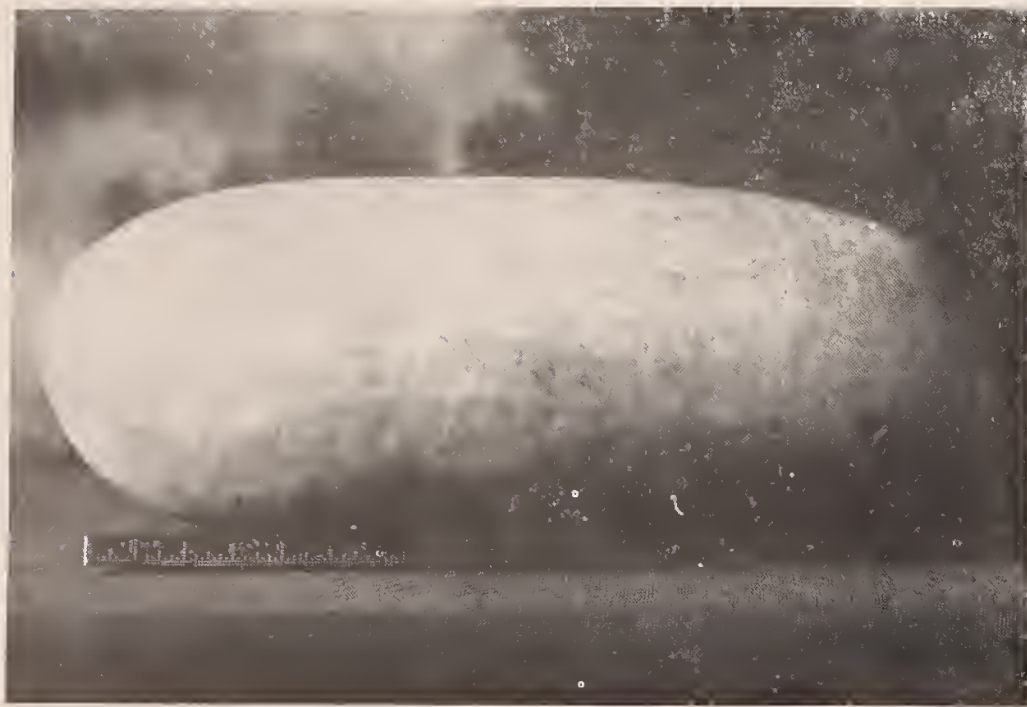

**THE J. C. ROBINSON SEED CO.**

**Waterloo, Nebr.**

**Rockyford, Colo.**

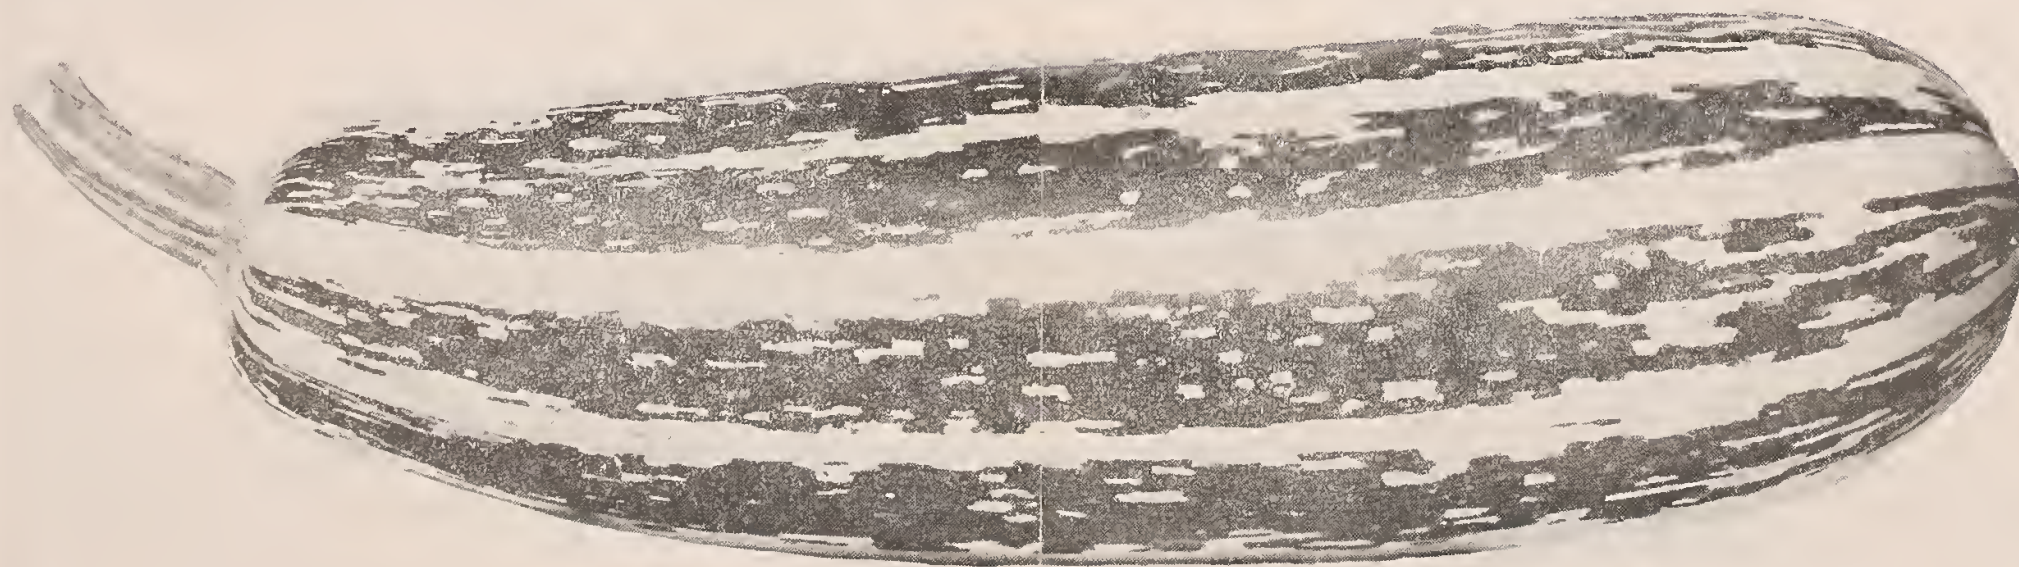

### **Irish Grey Watermelon**

Our strain of this is very fine. The best for long distance shipping in our opinion. Our melon seed is grown entirely in the north and is the very best produced in the United States.

### **Edwards Perfecto Cantaloupe**

This cantaloupe will be used almost entirely for long distance shipping in a year or two. It is salmon fleshed with the smallest seed cavity of any variety. It should be catalogued by every seed dealer.

### **Italian Cocozelle or Green Bush Marrow Squash**

A splendid sort, increasing in popularity each year. We think this variety with the other types of Vegetable Marrow well worth listing.

## King and Queen Watermelon

Originating in the Volga Valley of Russia, this melon will be as popular, when introduced as any on the market. It can be stored until February, retaining its attractive appearance and delicious qualities in full.

## Giant Summer Crookneck Squash

It needs no introduction. A standard variety for years, it still retains its popularity.
